Company Profile

Powering Saudi Arabia's progress
with reliable lifting, access, and
heavy equipment solutions.

About Us

Lifting Excellence, Building Trust

Eastern Cranes Corporation is a trusted name in heavy equipment rental and contracting across Saudi Arabia. Based in Dammam, we provide reliable lifting, access, and material handling solutions for industrial, construction, and infrastructure projects. With a modern fleet, certified operators, and a strong commitment to safety and quality, we ensure efficiency and excellence on every project.

We specialize in providing versatile cranes, boom lifts, forklifts, and other lifting equipment tailored to meet the needs of Saudi Arabia's construction and industrial sectors.

Our team ensures timely project execution, safety compliance, & unmatched service reliability — helping clients achieve maximum productivity & efficiency on every job site.

At Eastern Cranes Corporation, we believe that reliable equipment and skilled manpower are the backbone of successful projects. Our customer-focused approach, combined with advanced machinery and strong technical expertise, makes us a preferred partner for companies across the Kingdom seeking dependable lifting solutions.

Over

▲
15 Years

of Trusted Lifting Solutions

Our Equipment Fleet

Eastern Cranes Corporation proudly maintains one of the most advanced and versatile equipment fleets in the region. Our wide range of heavy lifting, access, and material handling equipment ensures optimal performance, safety, and reliability across diverse industrial, construction, and infrastructure projects. Each machine is regularly maintained, certified, and operated by skilled professionals to meet the highest standards of operational excellence.

01

Access Platforms

Provide safe and efficient aerial reach for construction and maintenance, ensuring stability, mobility, and precision in elevated work environments.

02

Cranes & Lifting Equipment

Deliver powerful lifting capabilities for diverse projects, offering mobility, strength, and reliability across construction, industrial, and infrastructure applications.

03

Material Handling Equipment

Ensure smooth, safe movement of heavy loads, supporting warehouse operations, logistics, and construction sites with efficiency and operational precision.

ACCESS PLATFORMS

Safe Height, Strong Reach

Eastern Cranes Corporation offers advanced access platforms built for reliability, safety, and efficiency. Designed to perform in diverse work environments, our platforms ensure secure elevation, stability, and superior reach for industrial, construction, and maintenance projects. With certified quality and modern technology, we deliver dependable height access solutions for every business need.

1. Superior Safety:

Foam-filled frames and certified designs ensure maximum operator safety and platform stability during every operation.

2. Versatile Performance:

Available in multiple models and power options, suitable for indoor, outdoor, and rough terrain applications.

Our Access Platforms Fleet

1. Telescopic Boom Lifts / Manlifts

Telescopic boom lifts provide extended horizontal reach and working heights up to 58 meters, ensuring efficient, safe, and versatile elevation for construction, maintenance, and industrial projects.

1. Articulated Boom Lifts / Manlifts

Articulated boom lifts offer exceptional maneuverability and reach, allowing operators to access difficult areas safely while maintaining stability, flexibility, and precision in elevated work environments.

3. Scissor Lifts

Scissor lifts provide vertical access with exceptional stability and compact design, offering working heights from 8 to 18 meters for efficient indoor and outdoor operations.

4. Compact Crawler / Spider Lifts

Compact crawler lifts deliver safe elevation in confined or uneven areas, combining light-weight structure, flexible movement, and strong stability for diverse indoor and outdoor environments.

Cranes & Lifting Equipment

Reliable Heavy Lifting Solutions

Our cranes and lifting equipment ensure safe and precise material handling across construction, industrial, and logistics sites, designed to handle heavy loads with stability.

01. Advanced Technology and Performance

Equipped with cutting-edge hydraulic systems and intelligent controls, our lifting machines enhance operational performance, reduce downtime, and increase productivity in all project environments.

02. Versatile Applications and Configurations

From mobile and tower cranes to telescopic handlers, our fleet supports diverse project needs, offering flexibility, safety, and reliability for every lifting challenge.

Cranes & Lifting Fleet

Power, Precision, and Performance in Every Lift

Our cranes and lifting equipment deliver unmatched versatility, stability, and lifting power for every terrain and project. Designed for efficiency, safety, and control—ideal for industrial, construction, and infrastructure operations.

01

All Terrain Mobile Cranes

Engineered for versatile performance, these cranes operate efficiently on highways and rough terrains.

02

Rough Terrain Mobile Cranes

These cranes deliver powerful lifting performance and reliable stability across uneven or off-road job sites.

03

Telescopic Crawler Cranes

Compact yet strong, these cranes merge crawler traction with telescopic reach for lifting in confined areas.

04

Crawler Cranes

These cranes feature lattice booms ensuring maximum height, superior strength, & unmatched lifting capacity.

05

Lifting Equipment

A complete range of lifting tools engineered for safe & accurate handling across industrial & construction tasks.

Material Handling Equipment

Efficient Material Mobility

Eastern Cranes Corporation delivers high-performance Material Handling Equipment designed for safety, strength, and precision. Our advanced fleet—including forklifts, boom trucks, and telehandlers—ensures seamless movement, stacking, and lifting of heavy materials across industrial, construction, and logistics environments. Engineered for durability and versatility, our equipment enhances workplace productivity and operational reliability.

Reliable Handling Solutions

Our material handling solutions are built to optimize workflow and safety in demanding operations. From warehouses to construction zones, Eastern Cranes Corporation's equipment ensures efficient material transport, superior load management, and dependable performance—empowering businesses to handle every task with precision, strength, and total control.

TADANO

Material Handling Fleet

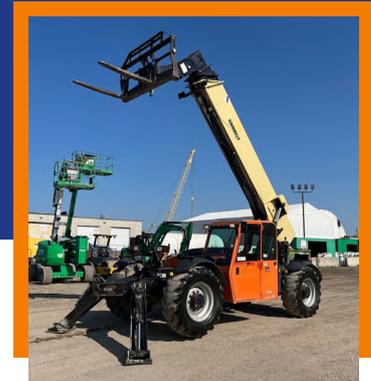

Forklifts

Reliable and robust, ideal for warehouses and construction sites, ensuring safe and efficient movement of heavy materials and goods.

Boom Trucks

Combine transportation and lifting functions, enabling quick loading, unloading, and precise material placement at different heights.

Telehandlers

Provide extended reach and lifting capabilities, designed for handling loads in tight spaces or elevated positions with stability and control.
